OFFICE MOVE?

We are really excited this month to showcase a new plug & play mobile office room build, just completed and handed over to the client at the end of January.

They have yet to decide where exactly they would like to locate it in their back garden space, so we have tried some different options for them. All of the Plug & Play units are built on durable, heavy-duty casters so can be moved around easily with very little effort.

The plug and play room has a footprint of 2.1 x 2.2m so can fit into most back yards and has a height of 2.4m which means it can fit in most carports and garages if this is convenient.

Please contact us if you would like more information on this product, or our range of larger models (contact details below).

ARTWORK SCREEN PANELS

**NEW
PRODUCT!**

To complement our teak and expanded metal options, Your_Space has introduced two different laser-cut screen patterns to our range. Made from lightweight metal sheet and finished with a durable power coated finish, they will last for many years in the extreme climate of the emirates. The panels are a standard size and will fit all our range of outdoor rooms.

These can also be retrofitted to our existing Your_Space outdoor rooms if you wish to change the look in the future. Optionally these can also be backlit with LED strip lights to create a beautiful unique look to the exterior rooms at night, creating your own individual artwork piece in your garden.

AVAILABLE IN DIFFERENT COLOURS

FALLING LEAF

This geometric pattern looks great during the daytime or backlit at night with our optional led lighting pack. Falling leaf has been designed with a geometric stylised design that works well in both contemporary and traditional garden settings.

(SHOWN HERE IN: LIGHT BRONZE)

DAPPLED LIGHT

Our Dappled light panel allows small patches of light to filter through, creating an incredible interplay of light and shadows. Based on the idea of sun light filtering through the gaps in the leaves of trees, these panels have perforated holes of different sizes to achieve this effect.
